Your Fund, Your Savings, Your Future

AVOIDING THE SECOND WAVE

South Africa have been successful in flattening the curve – the data and graphs on https://www.worldometers.info/coronavirus/country/south-africa reflect a significant reduction in daily cases and active cases reported. It is not however a time for complacency – there are still over 2,000 cases reported daily and the death rate has spiked.

Our health ministers have sounded a warning about a second wave of infections. In Alert Level 2, South Africans will be interacting more than before – with family and business colleagues – it is important to keep the hygiene levels and social distancing rules firmly in place.

Here are the updated statistics for South Africa as at 08 September 2020:-

- 640, 441 confirmed cases
- 15, 086 deaths
- 567, 729 recoveries
- 3,821,162 tests conducted.

PROTECT OTHERS AND YOURSELF - THE POWER IS IN YOUR HANDS

A COVID-19 alert SA App is now available for download on Apple App Store or Google Play. COVID Alert SA is South Africa's free exposure notification app, which lets people know when they have been in close contact with someone who has tested positive for COVID-19. The app is entirely anonymous and always protects your privacy and security, as it does not need or store personal information.

Who can use it?

Every South African that has a Bluetooth-enabled smartphone can access the app. You can also play your part by adding your phone to the fight.

How does the app work?

When the app user anonymously reports that they have COVID-19, the app sends notifications to those devices that were in close contact with this person's device. These disclosure notifications send's a warning that they could potentially have been exposed to the virus. Guidance is provided to app users on what to do next to boost their wellbeing and prevent the spread of the virus. Remember at no stage does the app disclose the user's identity. Your privacy and security are always protected.

COVID-19 Alert SA does the following:

- ☑ Always keep app user identities private
- ☑ Always protect app user security

Download COVID Alert SA today!

The power is in your hands.

COVID-19 does not do the following:

- ☒ Use GPS
- ☒ Track your location
- ☒ Ask you for or ever store your name, surname, or other identifying details
- ☒ Require access to contacts on your phone
- ☒ Require access to your health information

Let us use the COVID ALERT SA app to protect ourselves, our loved ones, and our communities
